EDUCATION

BCA
Punjabi University Patiala

06/2019 - 06/2022   *Patiala*

12th - Non medical
Civil Lines School

04/2018 - 04/2019   *Patiala*

10th
Civil Lines school

04/2017 - 04/2017   *patiala*

EXPERIENCE

Software Developer
Eitbiz

08/2023 - Present   *Delhi*

Tasks

- Implemented state management solutions, such as Redux, for efficient data flow and maintained a clean and modular codebase.
- Developed RESTful APIs and implemented CRUD operations using Express.js to enable smooth frontend and backend system communication.
- Applied responsive design principles and cross-browser compatibility testing to create consistent and visually appealing interfaces for diverse user demographics.

### Front End Developer
Max Vision Solution

01/2023 - 07/2023   *Delhi*

Tasks

- Developing and implementing user-friendly websites and web applications
- Collaborating with UX/UI designers to ensure designs are implemented accurately and with attention to detail.
- Troubleshooting and debugging website issues as they arise.

SKILLS

HTML   CSS   JavaScript   React   Redux

Boootstrap   Tailwind   Node js   Git/Github

Firebase   MongoDb   NextJs   Ionic

PERSONAL PROJECTS

Spotify Clone (12/2023 - 01/2024)
- Developed a full-stack web application using Next.js, TypeScript, and Tailwind CSS to replicate the core functionalities of the popular music streaming platform, Spotify.
- The project aimed to demonstrate proficiency in modern web development technologies and showcase the ability to build a complex application from scratch.
- Implemented user authentication and authorization functionalities using industry-standard practices to allow users to sign up, log in, and access personalized content securely.
- **Technologies Used:** Next.js, TypeScript, Tailwind CSS, Supabase (Database, Authentication, and API)
- Project Link: spotify-clone-07.vercel.app/

Car Rental (11/2023 - 12/2023)
- Developed a dynamic and performant Car Information System using Next.js to provide users with detailed specifications, including fuel average, performance metrics, and other relevant data.
- Integrated external APIs to enhance the breadth of available data.
- Employed Next.js's built-in optimizations for server-side rendering.
- **Technologies Used:** Next.js, TypeScript, Tailwind CSS
- Project Link: car-rental-zqj5.vercel.app/

Stack Overflow Clone (08/2022 - 09/2022)
- Developed a full-stack web application using the MERN Stack to replicate the core functionalities of Stack Overflow, a popular question-and-answer website for professional and enthusiast programmers.
- Designed and implemented features for users to post questions and provide answers.
- **Technologies Used:** React.js, JavaScript, Node.js, Express.js, MongoDB
- Project Link: stack-overflow-somesh07.netlify.app/
